16. Monsanto/Pfizer Chesterfield – Dr. Clarice Hutchins.
17. Chesterfield Elementary School, Dr. Meg Brooks, Principal.
18. Green Trail Elementary School, Dr. Rene Sommers, Principal.
19. Friendship Village Chesterfield, Pat Hays, Grounds Manager.

All separate and distinct efforts to improve the health of our habitat through time in terms of native flora for the biodiverse health of our pollinators, especially the Monarch Butterfly, and smaller native birds (native fauna). All are Certified by the NWF and are a part of our NWF Certified Community Wildlife Habitat in Chesterfield, the first and only NWF Certified Community Wildlife Habitat in our State for 12 years, since Spring 2005, and #9 in our Country. Now, there are over 173 such NWF Certified Communities across our Country. There are closed-campuses at both schools; go through the Principal's Office. Also, Pfizer/Monsanto and Friendship Village are closed campuses. In the schools' cases and Pfizer/Monsanto and Friendship Village, one can drive-by to observe. All others one can drive-by or get out and walk by or through.

This Nexus, in great part, helps to showcase our community's stellar conservation ethic which continues to grow, and improve, every year! There are many families which have their yards or special native habitat gardens NWF-certified, but they are private residences - - - our families continue to help make our NWF Community Certification so outstanding and resilient. Thank you Chesterfield.

\*The 2 we need to get email RSVP as of 3/22/17.
