

# Memorandum

---

To: TW Dieckmann, Director of Parks, Recreation & Arts *TW Dieckmann*

From: Mariah Wegener, Recreation Specialist – Arts & Entertainment

Date: 02/02/2024

Subject: Creative Community Alliance – Sculpture on the Move

---

This memo is to present information for the process of the sculpture selection for the Creative Community Alliance's (CCA) Sculpture on the Move program. The purpose of this memo is to secure our sculpture choice.

## **About CCA and Sculpture on the Move**

Creative Community Alliance (CCA) is a coalition of municipal and nonprofit organizations dedicated to the development of community arts in the St. Louis region. Sculpture on the Move is a program developed by the CCA that streamlines processes and bridges relationships with artists and communities. This program makes it as easy as possible to install high quality, original artwork in our community, and to enhance public spaces, with minimal cost and short-term (2 year) commitment.

## **Sculpture Top 10**

On January 22<sup>nd</sup>, I attended the 2024 Sculpture on the Move artwork presentation via Zoom. Following the meeting, the 2024 Sculpture on the Move presentation link was forwarded to the Parks, Recreation and Arts Citizen's Advisory Committee (PRACAC) via email. We requested each member to vote on their top 10 sculpture choices. This process was done by totaling the sculpture with the most 1<sup>st</sup> place votes, 2<sup>nd</sup> place votes, and so on. In the event of a tie, I used the total overall number of votes each sculpture received, and ranked which one had more votes higher on the top ten list.

The top 10 lists from PRACAC members were due February 2. That list will be reviewed by the Parks, Recreation and Arts Committee of Council (PRAcc) February 7. I will represent the City of Chesterfield at the art draft February 13. There will be a random draw to pick the order of the draft. We plan to send our final selection for City Council approval after the draft. Supporting documents are attached. Let me know if you have any questions.

Price: \$17,000

From: Missouri

**Descriptions:** My artwork, inspired by classical figurative sculpture along with geologic and Neolithic rock formations, takes a closer look at the individual, the person, and the weight they assume.

**Additional Info:** The overall form is safe for the public, fabricated out of durable gauge stainless steel with four tabs welded to the bottom allowing for easy welding or drilling to set concrete anchors into a cement footing. Installation requires no lifting equipment if a trailer can be backed up to the footing. If no lifting equipment is available, about five people would be needed to move off the trailer and lift upright.

I am intrigued with repetition in nature and the images used in these sculptures allow me to create an appearance of volume without mass. The balance between positive and negative space is also a main concern in this work. The use of solar lighting has increasingly become an important issue in my outdoor work. **Descriptions:** An India blue peacock standing atop a wood stone plinth. The three year old full size male had turned slightly and the wind has caught his tail. Completed in epoxy clay and resin. Plinth is constructed on wood base with a stone look.

**Additional notes:**

**Artist Name: Dani Schacht**

**Artwork Name: Cedar Peacock**

Dimensions: 44" x 18" x 16"

Media: Cedar tree trunk

Maintenance: May need additional varnish coatings after a few years depending on what elements it's exposed to.

Price: \$5,500

From: Pontotoc, MS

Website: [Schachtstudio.com](http://Schachtstudio.com)

**Descriptions:** Constructed from a felled Eastern cedar tree. The natural shape of the tree made cutting out a peacock very easy. The branches made great eyes for the tail as it sits atop a tree stump. Medium: pigments, varnish, epoxy.

**Additional notes:**

**Artist Name: Gabe Duggan**

**Artwork Name: Cacophony**

Dimensions: 4' x 4' x 7.5'

Media: Powder Coated Steel

**Delivery on in eastern MO, no more than 30 mins west of Columbia MO**

**Additional notes:** Does not require assistance, though an extra person can be helpful. This piece is designed to store flat and expands to its full iteration when installed on a concrete pad anchored by (8) 1/4" bolts through hardened 1/4" plates, welded to the base. Appropriate tools for anchorpoints (concrete/jackdriver) will be needed to treat the provided pad. Supply of the preferred anchors would be appreciated, or at least specific recommendations provided in advance.

**Descriptions:** Horses are very special to me, and have been an inspiration since I was very young. I used to watch them pulling the heavy carriages along the dairy route in northern Ecuador. My horses are a tribute to sacrifice and exploitation. Throughout their exploited past they have remained symbols of hope and justice. Used for equine therapy for troubled youth, I hope that with this recycled art, it awakens the new generation's sensitivity to a better world filled with justice, dignity, and peace.

**Additional Notes:** The horse is attached to a metal plate so it can be bolted down to the surface. Due to the size I expect overlap with the 4 ft. base.
