

Memorandum

Department of Planning

To: Planning and Public Works Committee

From: Shilpi Bharti, Planner

Date: August 18, 2022

RE: **Chesterfield Commons, Lot 14 (Schnucks) AAE:** Amended Architectural Elevations and Lighting Plan for a retail anchor on a 160.8 acre tract of land, zoned "C8" Planned Commercial District located at the south of THF Boulevard

Summary

BRR Architecture, on behalf of Schnucks, has submitted Amended Architectural Elevations for a 30,624 square-foot anchor retail building located in the Chesterfield Commons subdivision. The proposed changes are limited to exterior updates to the front façade of an anchor tenant space.

The changes include staining of the front façade brick to match the modern gray color, metal coping roof, EIFS Cornice, and Aluminum Plank at the sign area.

The project was reviewed by the Architectural Review Board on June 09, 2022. At that time, the Board made a motion to forward the Amended Architectural Elevations and Lighting Plan to the Planning Commission with a recommendation to approve as presented with conditions (vote 5-1). The applicant has since fulfilled those conditions.

The petition was reviewed by the Planning Commission on August 08, 2022. At that time, the Commission recommended approval of the request as submitted by a vote of 7-0, along with a recommendation of Power of Review by City Council. The City Council has called for Power of Review under Section 405.02.200 of the City Code.

There was a discussion at the meeting to provide additional brick stain samples for review, since then applicant worked on samples and will be providing additional brick stain samples at the meeting.

Planning Commission Staff Report

Project type:	Amended Architectural Elevations
Meeting Date:	August 08, 2022
From:	Shilpi Bharti, Planner
Location:	220 THF Boulevard
Description:	<u>Chesterfield Commons, Lot 14 (Schnucks) AAE:</u> Amended Architectural Elevations and Lighting Plan for a retail anchor on a 160.8 acre tract of land, zoned “C8” Planned Commercial District located at the south of THF Boulevard.

PROPOSAL SUMMARY

BRR Architecture, on behalf of Schnucks, has submitted Amended Architectural Elevations for a 30,624 square-foot anchor retail building located in the Chesterfield Commons subdivision. The proposed changes are limited to exterior updates to the front façade of an anchor tenant space.

HISTORY OF SUBJECT SITE

The Site Development Plan for the Chesterfield Commons Subdivision was approved in 1999 which has a site specific design package.

Figure 1: Subject Site Aerial Photo

The architectural features highlighted in the Chesterfield Commons design package include:

- Create uniformity in the overall design while respecting and providing for each tenant’s identity and trade dress.
- Utilize high quality materials to create and preserve a design of high quality and maintainability

STAFF ANALYSIS

The proposed changes include a metal coping roof, aluminum plank, and EIFS cornice tan brick stained at the front elevation. The proposed changes are intended to blend with the existing Chesterfield Commons architectural design. Below, (Figures 2 and 3) are images of the existing building followed by the proposed elevation.

Figure 2: Existing Building

Figure 3: Proposed Elevation

Although Chesterfield Commons originally developed as one entity, in recent history some of the anchor stores of Chesterfield Commons have made updates to their front façade.

In 2019, an anchor tenant introduced blue accents and darker grays into the facades. Below (Figure 4) is an image that identifies areas in which the updates were introduced to the Walmart tenant space.

Figure 4: 2019 Update to the Walmart Anchor

In 2021, the Target anchor tenant space undertook a large interior renovation. Also incorporated into the renovation was a modest update to the exterior façade. The most noticeable addition was an EIFS element on the front façade applied in a similar fashion as the subject site's proposed elevations. Below is an image of the updates to the Target building.

Figure 5: Recent Update to the Target Anchor

Landscape Plan:

It should be noted, earlier in 2022, the same applicant received approval for an amended Landscape Plan. This update included the replacement of existing plantings with 4 deciduous ornamental trees (Sweetbay magnolia) and 30 new shrubs in front of the building in the existing planters.

Figure 6: Landscape Plan

Lighting Plan:

The applicant is proposing festoon lighting under the existing entry canopy. The proposed light is black polymer plastic fixtures with frosted white bulbs of warm white color. The light will remain static. The light fixture is proposed under the canopy but will be visible from outside.

Figure 7: Lighting Plan

Rendering:

Below is a rendering incorporating the changes with the updated landscaping.

ARB Meeting Report

The project was reviewed by the Architectural Review Board on June 9th, 2022. At that time, the Board made a motion to forward the Landscape Plan, Lighting Plan, Amended Architectural Elevations and Architect’s Statement of Design to the Planning Commission with a recommendation to approve as presented with the following conditions:

1. Confirm that the staining of the masonry accurately matches the color sample provided vs. the rendered image.
2. Material samples of the north elevation including but not limited to, the branding wall, green paint sample, and best example of existing brick shall be made available to the Board.
3. A copy of the updated Landscape Plan shall be made available to the Board.

Since then, applicant has addressed all the conditions.

DEPARTMENTAL INPUT

Staff has reviewed this proposed development and found it to be in compliance with the City’s Unified Development Code and site-specific ordinances. All outstanding comments have been addressed at this time. Staff has no further comment, Planning Commission may vote on this tonight.

MOTION

The following options are provided to the Planning Commission for consideration relative to this application:

- 1) "I move to approve (or deny) the Amended Architectural Elevations and Lighting fixture for Chesterfield Commons, Lot 14 (Schnucks) as presented."
- 2) "I move to approve the Amended Architectural Elevations and Lighting fixture for Chesterfield Commons, Lot 14 (Schnucks) with the following conditions..." (Conditions may be added, eliminated, altered or modified)

INSTALLATION RECOMMENDATIONS

- Determine weight of marketLITE that will be used.
- Determine length of marketLITE and multiply by weight.
- An engineer must choose the proper aircraft cable to handle the tension, based on length and weight to prevent product from sagging.
- An engineer must determine the strength of the structure where the cable will attach, based on tension calculation from previous step.
- If installing on a pole, check with pole manufacturer to confirm the pole can handle the tension.
- marketLITE is hung to the above aircraft cable using the hooks. Secure hooks to aircraft cable by crimping or using stainless steel tie wraps.
- The supplied aircraft cable is designed to prevent strain on the wire. An additional aircraft cable is required to hang marketLITE.

Those client-approved drawings take precedence and provide final direction for design, printing and production.

Narrative:

The design started with the goal of a fresh, welcoming, modern store. On the front façade, the proposed brick stain will maintain the texture used throughout the shopping center but be a brighter color. This lighter color will be used on either side of the main entry covering the existing tan-colored brick, which wraps around the corner of the building. Using the secondary color will add a bit of contrast to the burgundy brick, which will remain. This slight change from the adjacent buildings will help it be identifiable as different yet complementary; a clean, fresh, & welcoming place.

No changes to Site

Narrative:

Our client is requesting the approval of festoon lighting under the existing entry canopy. They want to create a welcoming and lively atmosphere for the entry of the currently vacant space at 220 THF Boulevard to attract and retain customers to the development. The warmth and shape of the festoon lights will help compliment the already neutral color pallet of the existing development. We are proposing 4.43" H x 1.93" W black polymer plastic light fixtures with frosted white bulbs. They will be located at varying heights underneath the entry canopy and will be connected to the building signage illumination timer, so they only operate when the building store signage is in use. The lights will remain static when in use. Their illumination levels are 32.78 Foot Candles, the color temperature is 2700K also called Warm White.

Luminaire Schedule
