

Architectural Review Board Staff Report

Project type: Amended Architectural Elevations
Meeting Date: November 14, 2019
From: Chris Dietz, Planner 
Location: 17392 Chesterfield Airport Road
Description: **Chesterfield Commons West, Lot 1 (Walnut Grill):** Amended Architectural Elevations for a restaurant building on a 0.84-acre tract of land, zoned "PC" Planned Commercial District located on THF Boulevard, northeast of its intersection with Public Works Drive.

PROPOSAL SUMMARY

Core 10 Architecture, on behalf of Walnut Grill Chesterfield, LLC, has submitted Amended Architectural Elevations for a restaurant building at 17392 Chesterfield Airport Road.

The proposed changes include:

- Replacing existing windows.
- Replacing existing metal awnings with fabric awnings.
- Replacing doors at the main entrance, side entrance and patio access with stainless-steel door/sidelights.
- Updating exterior accent lighting fixtures.
- Replace existing columns with a new EIFS columns style typically found at other locations within the restaurant brand.

There are no proposed changes to the building footprint and all existing heights of parapets and brick accent walls are to remain in place.

Figure 1: Aerial View of Subject Site

HISTORY OF SUBJECT SITE

This development was rezoned from an "M3" Planned Industrial District to a "PC" Planned Commercial District in 2000 via City of Chesterfield Ordinance 1624, which was repealed and replaced with the approval of the current governing Ordinance 2156 in 2005 to allow seasonal outdoor storage for the westernmost anchor store.

(Continued)

A Site Development Section Plan for a restaurant on Lot 1 of Chesterfield Commons West (Applebee's) was approved in February of 2004. An Amended Site Development Section Plan was approved in 2014 to add a patio space west of the building when it was occupied by, and operated as Syberg's Restaurant.

A Design Package was required as part of the Site Development Concept Plan for the Chesterfield Commons West development per the site-specific ordinance and was approved in May 2001. The approved Design Package matches that of Chesterfield Commons, essentially rendering Chesterfield Commons West an additional phase of the overall Commons area. The following architectural design guidelines are included in the Design Package pertaining to the outlots of this development:

Figure 2: Color Site Plan

1. Create uniformity in the overall design concept while respecting and providing for each Tenant's identity and trade dress by utilizing exterior building materials that are compatible in type, color, texture and massing as those utilized on the retail center.
2. Exterior materials shall be consistent about all sides of the building.
3. All rooftop equipment shall be screened by a parapet wall or similar exterior wall/canopy extensions above the roof line, equal to the height of the rooftop equipment.
4. All service areas and refuge containers shall be screened utilizing the same materials as those used in the building's exterior wall construction.
5. All site lighting fixtures shall be of the type, style, and color utilized for the retail center.
6. Site Design, paving, landscaping etc. shall be consistent in detail, type, and quantities with that utilized for the retail site.

STAFF ANALYSIS

A. Materials and Color

The existing primary building material consists of a brick base that is found on each side of the building, consistent with adjacent properties and other developments within the Chesterfield Commons area. The brick base and accent features, along with the existing EIFS finish are to remain in place, as they offer consistency to the other buildings within this development. The existing corrugated metal awnings are to be replaced, while the metal canopy over the patio is to be removed entirely. EIFS columns are proposed to replace the existing wood columns and are intended to slightly contrast with the existing color currently found on the building. This point is illustrated in Figures 3.a and 3.b below.

(Continued)

Figure 3.a: Existing Columns (East Elevation)

Figure 3.b: Proposed Columns (East Elevation)

The Main entrance will have a stainless-steel door and sidelights with limestone veneer infill flanking either side of the doorway. Lastly, a stainless-steel canopy will replace the existing blue timber awning, as figures 4.a and 4.b illustrate below. The incorporation of stainless steel will be continued with the addition of three (3) bi-fold doors that exit to the patio, as seen on the West Elevation.

Figure 4.a: Existing Main Entrance

Figure 4.b: Proposed Main Entrance

(Continued)

B. Elevations

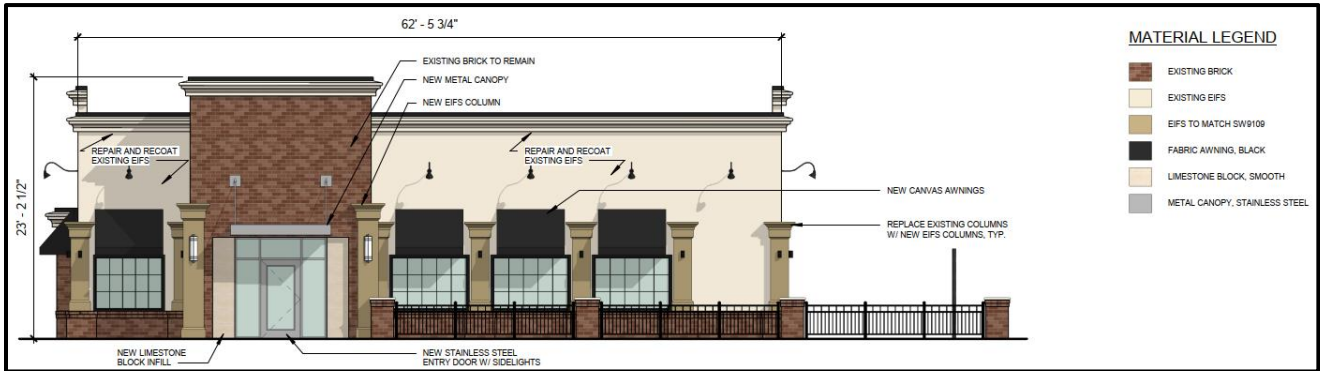

Figure 5: North Elevation

Figure 6: South Elevation

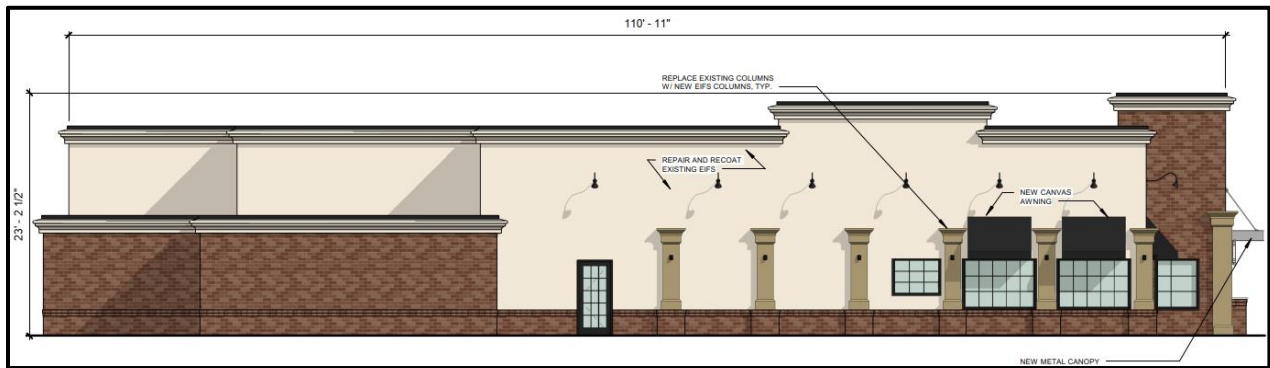

Figure 7: East Elevation

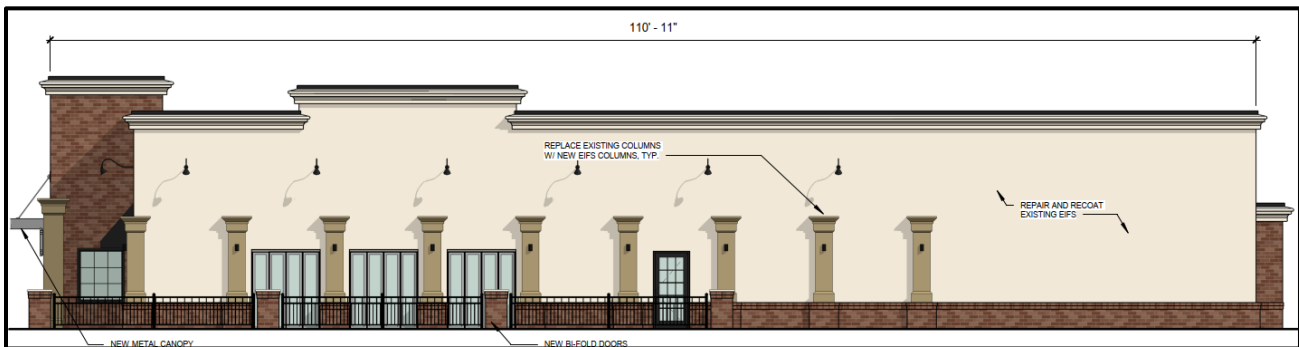

Figure 8: West Elevation

(Continued)

C. Lighting

Four (4) lighting fixtures are being proposed with this request, (Illustrated in Figure 9):

- Two (2) decorative sconces on either side of the main entrance,
- Sixteen (16) wall-mounted lamps affixed to the EIFS on North, East and West Elevations,
- Eighteen (18) downward-only facing decorative light fixtures adorning each of the proposed EIFS columns on the North, East and West Elevations, and
- String Lighting over the patio area.

Figure 9: Proposed Lighting

Figure 10 shows the illumination for the proposed wall-mounted fixtures. Please refer to the photometric plan and corresponding cutsheets in the submittal packet for exact locations for each fixture.

Figure 10: Lighting Diagram

(Continued)

D. Landscaping

No changes to the site's landscaping are proposed. However, the applicant is informed that any outstanding deficiencies measured against the approved landscape plan must be brought into compliance before an occupancy permit will be released.

E. Signage

Signage is not part of the proposal before the Architectural Review Board and will be reviewed separately.

F. Rendering

DEPARTMENTAL INPUT

Staff requests review and recommendation on the Amended Architectural Elevations and Partial Amended Lighting Plan for Chesterfield Commons West, Lot 1 (Walnut Grill).

MOTION

The following options are provided to the Architectural Review Board for consideration relative to this application:

- 1) "I move to forward the Amended Architectural Elevations for Chesterfield Commons West, Lot 1 (Walnut Grill), as presented, with a recommendation for approval (or denial) to the Planning Commission."
- 2) "I move to forward the Amended Architectural Elevations for Chesterfield Commons West, Lot 1 (Walnut Grill) to the Planning Commission with the following recommendations..."

Attachments

1. Architectural Review Packet Submittal

Chesterfield Commons West, Lot 1 (AAE)**Architect's Statement of Design**

The proposed renovation of this existing Syberg's restaurant for Walnut Grill meets or exceeds Chesterfield's General Requirements for Building Design. The Owner intends to remove the old incongruous Applebee's-era timber and metal canopy feature, install new fabric awnings over windows (to allow more light inside and visibility from outside). The brick and existing EIFS finish which already are in keeping with the adjacent developments will be maintained and new engaged column elements added to tie the sides and front of the façade together. The main entry door and sidelights will be updated with Walnut Grill's distinctive stainless steel entrance and smooth face limestone veneer. The patio will be made more welcoming and accessible by replacing three west windows with three new pairs of bifold patio doors.

General Requirements for Site Design

- Site Relationships: No change.
- Circulation System and Access: No change. The existing site is accessed via one entrance drive from THF Boulevard to the south. Internal two-way site vehicle circulation and parking configuration will remain unchanged.
- Topography: No change. The existing site is essentially flat.
- Retaining Walls: Not applicable / No change.

Michael Byrd, AIA CSI

Tyler Stephens, AIA

General Requirements for Building Design

- Scale: No change. The building will remain approximately the same size and height as the adjacent properties.
- Design: Owner proposes limited exterior renovations only. Existing perimeter walls, trash enclosure, and parapet walls will remain. As with the current Spaghetti Factory to the east and the two-tenant building to the west the main entrance will continue in it's present configuration facing north towards Chesterfield Airport Road. The current outside seating area will remain, with new access to the patio via three new pairs of bi-fold doors to be installed in place of three existing windows on the west façade.
- Materials and Color: Existing building is primarily tan colored EIFS and red brick. Existing blue metal canopy and supporting columns are to be removed. EIFS will be patched and painted to match surrounding finish. EIFS engaged columns will be reconfigured in place as indicated. New awnings will be black to match corporate colors and existing windows to remain.
- Landscape Design and Screening: No change. We are submitting previous landscape plan per city request.

- Signage: New signage is not addressed in this application and will be described in a separate and subsequent application.
- Lighting: Exterior building-mounted lighting will be replaced with updated lighting as indicated. New lighting will be 3k color. See attached lighting rendering for distribution of proposed lighting. Note that we do not model proposed string lights over the patio area which are individually shaded and do not cast light on the building façade.

Specific Requirements for Chesterfield Valley

Facades: Existing building façade includes elements from the front façade on the sides and rear as required. Accent lighting is as indicated. Floodlighting is not proposed. Existing trash enclosure is constructed of materials consistent with the building.

Storage: Not applicable.

Utilities: No changes to underground site utilities are proposed.

Parking: Parking is located primarily on the sides and rear of the north façade. No loading docks or large doors requiring screening exist or are proposed.

Michael Byrd, AIA CSI

marketLITE™
Manufactured in the U.S.A.

LAMP OPTIONS

Material: Polymer Plastic
Appearance: Frosted
Lamp Watts: 1W
Lamp Life: 20,000 hrs.
Lamp Type: Standard LED
Lumens: 42
Beam Angle: 360°
Temperatures: 2.7K, 5.0K

G Shape (GSF)

Material: Glass
Appearance: Clear
Lamp Watts: 3W
Lamp Life: 25,000 hrs.
Lamp Type: Filament LED
Lumens: 256
Beam Angle: 360°
Temperatures: 2.4K, 2.7K, 3.0K, 5.0K

Filament G Shape (GSFL)

Material: Polymer Plastic
Appearance: Frosted
Lamp Watts: 1W
Lamp Life: 20,000 hrs.
Lamp Type: Standard LED
Lumens: 42
Beam Angle: 360°
Temperatures: 2.7K, 5.0K

S Shape (SSF)

Material: Polymer Plastic
Appearance: Frosted
Lamp Watts: 1W
Lamp Life: 20,000 hrs.
Lamp Type: Standard LED
Lumens: 42
Beam Angle: 360°
Temperatures: 2.7K, 5.0K, A, R, G, B

S Shape (SSC)

ML2000-PP	Rubber	N/A		Each
ML2000-MP	Stainless Steel	N/A		Each
ML2000-CL-1/8"	Zinc	N/A		Each
ML2000-AC-1/8"-X	302/304 Stainless Steel			Each

INSTALLATION RECOMMENDATIONS

- Determine weight of marketLITE that will be used.
- Determine length of marketLITE and multiply by weight.
- An engineer must choose the proper aircraft cable to handle the tension, based on length and weight to prevent product from sagging.
- An engineer must determine the strength of the structure where the cable will attach, based on tension calculation from previous step.
- If installing on a pole, check with pole manufacturer to confirm the pole can handle the tension.
- marketLITE is hung to the above aircraft cable using the hooks. Secure hooks to aircraft cable by crimping or using stainless steel tie wraps.
- The supplied aircraft cable is designed to prevent strain on the wire. An additional aircraft cable is required to hang marketLITE.

One-Light Outdoor

 Wall mounted • Wet location listed **PROGRESS LED**

Description:

5" wall cylinder. The P5674 Series are ideal for a wide variety of interior and exterior applications including residential and commercial. The Cylinders feature a 120V alternating current source and eliminates the need for a traditional LED driver. This modular approach results in an encapsulated luminaire that unites performance, cost and safety benefits.

Specifications:

- Black (-31) (powder coat paint)
- Die cast and extruded aluminum Construction
- Die-cast aluminum construction with durable powder coated finish
- 788 lumens 46 lumens/watt
- 3000K color temperature, 90+ CRI
- Dimmable to 10% brightness (See Dimming Notes)
- Back plate covers a standard 4" octagonal recessed outlet box
- Mounting plate for outlet box included
- 6" of wire supplied
- Meets California Title 24 high efficacy requirements for outdoor use only

Performance:

Number of Modules	1
Input Power	16.9w
Input Voltage	120 V
Input Frequency	60 Hz

7328

STANDARD SPECIFICATIONS

HOUSING

The modern design is a one piece housing assembly with the diffuser held in place by formed rails. The assembly consists of formed, cold rolled steel parts that welded and fastened with hardware. The decorative trim is cut from 1/4" steel, and fastened directly to the base housing. This fixture is not recommended for installation along coastal areas. Contact factory for further details.

DIFFUSER

A simple white UV stabilized acrylic panel provides an understated elegance to this sleek design.

ELECTRICAL

FT CFL, 4-pin 2G11 Base 3000K lamp - 120-277V Electronic HPF Ballast
 T5 Linear Fluorescent, bipin lamp (by others) - 120-277V Electronic HPF Ballast
 T5HO Linear Fluorescent, bipin lamp (by others) - 120-277V Electronic HPF Ballast

Fluorescent fixtures utilizing an occupancy sensor should include a programmed start HPF ballast. Fluorescent lamps powered by instant start or rapid start ballasts, or GU24 base compact fluorescent lamps used in this application may result in severely shortened lamp life and/or ballast damage.

MOUNTING

The 7328 series is designed to be mounted directly to a j-box (by others), and additional wall anchors (by others) at the ends of the fixture.

FINISH

The 7328 series is available in Nickel Tone as a standard, and in all Brownlee paints as an optional offering.

FIRE RETARDANT

FIRESIST® delivers a state-of-the-art combination of flame retardant performance and UV resistance that exceeds industry standards.

WEATHER RESISTANCE

With over 100 years of outdoor awning experience, Glen Raven has engineered new coatings and finishes to maximize water repellency, sunlight resistance, and ease of cleaning.

COLOR RETENTION & STRENGTH

The deep, rich colors and robust durability of FIRESIST deliver long lasting good looks to any application. Plus, workability improvements make cutting, sewing and welding easier than ever.

STYLING

The new FIRESIST color palette focuses on popular solids, tweeds and stripes.

TECHNICAL DATA	
Weight	8.75 oz. per square yard
Width	60"/ 152.4 cm
Color	Solution dyed to resist color loss from UV exposure and weathering. Resistant to most chemicals, including bleach.
WARRANTY	5 years against loss of color or strength.
SURFACE	Plain weave - Highly water repellent and soil/stain release finish.
UNDERSIDE	Urethane/acrylic coating
TRANSPARENCY LEVEL	Lighter shades translucent for back-lighting applications.
ABRASION RESISTANCE	Excellent
FLEXIBILITY	Excellent in both hot and very cold conditions.
FLAME RESISTANCE (PASSES ALL, BUT NOT LIMITED TO)	California State Fire Marshal Title 19 NFPA 701-99, test method II CPAI-84; Tent walls and roof FMVSS 302 FAA 25.853 (Aviation) UFAC Upholstered Furniture, Class 1
MILDEW RESISTANCE	Excellent (with proper maintenance and cleaning)
CHEMICAL RESISTANCE	Excellent
WATER REPELLENCY	Excellent
OIL RESISTANCE	Very good
SEWABILITY	Excellent
HEAT SEALING	Can be heat sealed using sealing tape and heat source such as wedge, hot air, radio frequency welding, etc.
